

QGIS Application - Bug report #21406

QGIS 3 dialog size to small when when adding features to shape

2019-02-27 02:09 PM - Benjamin Gnep

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	mac_os_specific	
Affected QGIS version:	3.4.4	Regression?: No
Operating System:	MaxOS High Sierra 10.13.06	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 29223
Description		
<p>When I set a shape file to editing mode and click into the map to add a new features the popup dialog with the attribute tablet opens very small. I can manually adjust the size per mouse click to see the full content of the table and type in my edits. However, when I close the dialog and want to add the next feature the dialog opens with the tiny size again and I have to adjust the window size again to be able to add edits. That soon gets quite annoying when many features need to be added.</p>

That dialog can be resized on Windows and Linux, strange is not on macOS?

Related to #20380 ? In 3.6 I'm able to resize the dialog manually.

#3 - 2019-03-05 08:41 AM - Benjamin Gnep

I can adjust the dialog manually - that is not the problem. However, the default popup size is so small that I have to adjust this every time to be able to enter data. That makes QGIS 3 almost useless when hundreds of points have to be entered as in my case. Then I need to switch back to QGIS 2.18 where the popup size fits the dimensions of the attributes table and I can directly enter data without the need to adjust the dialog size first.

Indeed, it seems to be related to #20380

Any ideas what might be the problem or could be a workaround?
