Affected QGIS version:	3.4.5	**Regression?:**	No
Operating System:	Mac OS X	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	29267

Description

The latest QGIS v3.4.5 LTR and 3.6.0 require the GDAL Complete 2.4 framework package to be installed per the Mac OS X readme. However, this package is not available at kyngchaos.com. A failure to import processing message appears when opening QGIS without the 2.4 frameworks installed. Could this package be added to the website?

History

#1 - 2019-03-02 10:10 PM - Giovanni Manghi

- Easy fix? changed from Yes to No

- Category changed from GDAL Tools to mac_os_specific

#2 - 2019-03-03 09:29 AM - Saber Razmjooei

- Status changed from Open to Feedback

If you are using macOS 10.13 or 10.14, try these:
