<b>Description</b>		
<p>Hi all,</p> <p>I noticed that when I try to resize (make smallest) the right panel in QGIS (all version), this It is allowed only if the style layer manager it is not active...</p> <p>This is not a problem on big monitors,</p> <p>but in small monitor (like notebook ones) it tightens a lot the canvas size (reducing its usability)</p> <p>in case the style layer panel is active</p> <p>Best Regards</p> <p>Antonio</p>
