

# QGIS Application - Bug report #21468

## Fiona can't be imported into python37, DLL error

2019-03-04 11:37 AM - Andreas Mueller

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Python bindings / sipify	
<b>Affected QGIS version:</b> 3.4.5	<b>Regression?:</b> No
<b>Operating System:</b> Windows 7	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> invalid
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 29285

### Description

I installed fiona along with qgis3 and python3 via osgeo4w-setup.exe but it throws an exeption:

```
C:\OSGeo4W>python3
Python 3.7.0 (v3.7.0:1bf9cc5093, Jun 27 2018, 04:06:47) [MSC v.1914 32 bit (Intel)] on win32
Type "help", "copyright", "credits" or "license" for more information.
>>> import fiona
Traceback (most recent call last):
  File "<stdin>", line 1, in <module>
  File "C:\OSGeo4W\apps\Python37\lib\site-packages\fiona\__init__.py", line 87, in <module>
    from fiona.collection import BytesCollection, Collection
  File "C:\OSGeo4W\apps\Python37\lib\site-packages\fiona\collection.py", line 9, in <module>
    from fiona.ogrext import Iterator, ItemsIterator, KeysIterator
ImportError: DLL load failed: Das angegebene Modul wurde nicht gefunden.
```

This is often reported as a version conflict with gdal.

### History

#1 - 2019-03-04 11:59 AM - Jürgen Fischer

- Resolution set to *invalid*

- Status changed from *Open* to *Closed*

Not a QGIS issue.
