| <b>Description</b>  |                                     |
| Hi Folks,   |                                     |
| Heard somewhere (mailings list or slack somewhere...) that someone indicated this menu item was missing from Vector, Geometry Tools. Just noticed the following in the processing logs. |                                     |
| 2019-03-05T13:10:34 WARNING Invalid algorithm ID for menu: qgis:polygonstolines   |                                     |
| OK in 3.4.5, missing in 3.6.0   |                                     |
