

QGIS Application - Feature request #21480

Integrate Project Home to save options

2019-03-05 03:04 PM - Andy Whyte

Status:	Open	Resolution: Copied to github as #: 29297
Priority:	Low	
Assignee:		
Category:	Unknown	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>I think it would be a nice addition to integrate the project home directory to save options throughout QGIS.</p> <p>This would stop you from needing to navigate each time when using different functions. For example (see image) when you select the save options from processing algorithms.</p>
