Crash ID 3a960dd7025d0c7ba7054c24245db3f4c0318d14		
When exporting in 3.6 (windows) to PDF from composer, the programme keeps crashing. When exporting to JPEG or any image format, the programme states it has exported and offers a hyperlink but no file is output. It will not print directly either.

Does not happen on 3.6/Linux. Can you test on a clean/new profile (no 3rd party plugins installed), thanks!

Works with a clean version - would appear to be an issue with using a template created in 1.8.

Cheers!
