

QGIS Application - Bug report #21502

"data defined size legend" do not uses the "size from/to" parameter and always uses the "value from/to" values, resulting in out os scale legends

2019-03-06 06:31 PM - Giovanni Manghi

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Legend	
Affected QGIS version:	3.7(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 29319
Description		
<p>... unless using an expression..</p> <p>add a point layer with a column with value between 1 and 100</p> <p>enable the data defined size controlled by the assistant</p> <p>set the "value from/to" from 1 to 100, but the "size from/to" from 1 to 10 > size of points will be between 0 and 10</p> <p>enable the "data defined size legend", size of symols will be between 1 and 100, resulting in huge (not usable) symbols in legend</p> <p>Does only apply to the "separated legend items" option.</p>
