

# QGIS Application - Bug report #21508

## Saving Layer Theme discards subgroup selection

2019-03-07 08:53 AM - Charl Jooste

<b>Status:</b> Open	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Symbology	
<b>Affected QGIS version:</b> 3.6.0	<b>Regression?:</b> No
<b>Operating System:</b> Windows 10	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 29325

**Description**

When you save layer themes have groups with layers that have been selectively activated within subgroups.

If you save the layer theme and load it again, all the selections in a subgroup will be switched off if the parent group was switched off.

It should save the state of each layer in the subgroups (or nested groups if applicable) as well.
