

QGIS Application - Feature request #21531

Add support for multilayer/multiband raster inputs in the "input raster layers" Processing widget

2019-03-08 07:08 PM - Giovanni Manghi

Status:	Open	Resolution: Copied to github as #: 29347
Priority:	Normal	
Assignee:		
Category:	Processing/Core	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
It would be useful if in the Processing widget to select multiple raster layers would be possible to select as different inputs the bands of a single datasource.		
There is already a widget "select bands" (used for example in the "rearrange bands" tool), the idea would be to use the same functionality but were the bands can be used as inputs.

Hi, any news here? How can we proceed (this issue is a showstopper for us)?

thanks
