QGIS Application - Feature request #21564
since 2.18 was deprecated, the latest Mac versions are unavailable

2019-03-12 08:55 AM - Gavin Fleming

Status:	Feedback		
Priority:	Normal

Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	29380

Description

on Kyngchaos, only 2.18.01 is available and http://download.osgeo.org/qgis/mac/ only goes up to 1.0.

I would like to get the last 2.18 version as I still need 2.18 for many projects and plugins.

Hi Gavin,

I don't think this can be classified as a QGIS (the application) feature request/issue. This is a matter of making available installers on a web site, I suggest to use a more direct approach and raise the matter on the developers mailing list.

The proper place to download QGIS versions now is QGIS website, ie https://qgis.org/en/site/forusers/download.html (you have 3.4 and 3.6 dmg files)
