QGIS Application - Feature request #21576
The option to set "Reuse last entered attribute values" for individual form fields separately.

Description

With some fields i need to use last entered values, but also (at the same time) i need use expression as default values for other fields.

For now only one of the enabled options works. If I check "settings/option/digitizing/ - Reuse last entered attribute values" then my expressions work only with the first object entered, next will be as "Reuse last entered attribute values"
