| <div>Status:Open</div> <div>Priority:Normal</div> <div>Assignee:</div> <div>Category:Symbolology</div> <div>Affected QGIS version:3.6.0</div> <div>Operating System:</div> <div>Pull Request or Patch supplied:</div> <div>Crashes QGIS or corrupts data:</div> | <div>Regression?:No</div> <div>Easy fix?:No</div> <div>Resolution:</div> <div>Copied to github as #: 29406</div> |
| <div>Description</div> <div>1. Open settings>style manager</div> <div>2. Stay in the favourites.</div> <div>3. Click in the name of a symbol, and rename it.</div> <div>4. The symbol will disappear from the favourites.</div> <div>Tested in 3.6 on Windows.</div> <div>I note that symbols don't lose their tags when you rename them, and a tag is conceptually similar to being a favourite.</div> | |
