

QGIS Application - Feature request #21597

Select by Location: Search Distance

2019-03-15 08:14 PM - Brett Carlock

Status:	Open	Resolution: Copied to github as #: 29413
Priority:	Normal	
Assignee:		
Category:	Processing/QGIS	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
<p>A behavior I've found quite helpful from ESRI is the "Search Distance" function while performing a Select by Location. Granted, something similar can be fudged by buffering the selection layer by whatever units prior to using it against the features layer, but having this built into the selection tool can save a number of steps.</p> <p>Request:</p> <p>Select by Location to have an optional Search Distance feature.</p> <p>Search Distance feature to support arbitrary/defined units (not only units in layer/project CRSs).</p>		

History

QGIS.PNG

Should have shown the number of selected features to be 1733, instead of 2394 like ArcGIS Desktop/Pro.
