

QGIS Application - Bug report #21609

OGR_ORGANIZE_POLYGONS unconditionally set in OGR provider

2019-03-18 01:12 PM - Even Rouault

Status:	Open	
Priority:	Normal	
Assignee:	Even Rouault	
Category:	Data Provider/OGR	
Affected QGIS version:	3.7(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29425
Description		
<p>The OGR_ORGANIZE_POLYGONS configuration option is unconditionally set to ONLY_CCW in the OGR provider</p> <p>I believe this is inappropriate (should honour the value the user might have defined itself), and useless. The OGR shapefile driver uses the ONLY_CCW strategy by default.</p> <p>And this setting prevent the fix for https://github.com/OSGeo/gdal/issues/1369 for non-conformant multipolygons in FileGeodatabase to be effective from QGIS.</p>
