

QGIS Application - Bug report #21624

Layouts with variables/expressions do not update properly after page format change

2019-03-20 08:50 AM - Andreas Neumann

Status: Closed	
Priority: High	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: 3.7(master)	Regression?: Yes
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 29440
Description	
<p>When using variables and expressions in a layout in order to position and size items (e.g. @layout_pagewidth and @layout_pageheight in combination with an expression), then the items do not update properly after a change of page size or orientation.</p> <p>The sample project contains 2 layouts: "Test" and "Test 2". The first contains only a rectangle, the second one a full layout with all items positioned and sized dynamically.</p> <p>In QGIS master (3.7) and LT version (3.4 master) it updates, after pressing the "Refresh View" button.</p> <p>This used to work in the past. The issue did once appear, was fixed, but now it reincarnated again.</p>
