

QGIS Application - Feature request #21628

Expression values in Multi-Edit mode

2019-03-20 05:08 PM - Mattias Spangmyr

Status:	Open	Resolution: Copied to github as #: 29444
Priority:	Normal	
Assignee:		
Category:	Attribute table	
Pull Request or Patch supplied:	Yes	
Easy fix?:	No	
Description		
<p>It would improve the multi-edit mode if values for each field could be set using an expression (as they can when editing one field at a time).</p> <p>A further improvement would be to let the user select a template feature from which to copy attributes. I think this could be achieved already by enabling expression values, but it might not be simple enough for the average user.</p>
