

QGIS Application - Bug report #21644

Python Console Panel does not respect location/status across QGIS sessions

2019-03-21 04:31 PM - Brett Carlock

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	GUI	
<b>Affected QGIS version:</b>	3.6.0	<b>Regression?:</b> No
<b>Operating System:</b>		<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29460
<b>Description</b>		
<p>If you add the Python Console panel to your QGIS layout and dock it somewhere, it will not return to the same location when you close/re-open QGIS. It defaults to being disabled/turned off.</p> <p>However, when you select it from the Plugins-&gt; Python Console menu item, it does restore to the same docked area it was before, but its tab order will not be respected/restored.</p> <p>I've attached a screenshot of where/how I typically want my Python console docked.</p>

It respects location, just not status (enabled/docked or not).

Apologies.
