

QGIS Application - Bug report #21658

WFS connection manager: it's impossible to override the URIs reported in service capabilities

2019-03-23 03:02 PM - Andrea Giudiceandrea

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Web Services clients/WFS	
Affected QGIS version:	3.7(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 29474
Description		
<p>In QGIS 3, the WFS connection manager dialog window lacks options to override the (GetFeature, DescribeFeatureType, ...) URIs reported in service capabilities, while WMS/WMTS and WCS connection managers have those options ("Ignore GetMap/GetTile URI reported in capabilities"/"Ignore GetFeatureInfo URI reported in capabilities" for WMS/WMTS and "Ignore GetCoverage URI reported in capabilities" for WCS).</p> <p>This leads to the impossibility of adding WFS layers to a map in some circumstances.</p> <p>In QGIS 2.18 this was not the case, because the WFS provider didn't (incorrectly, anyway) comply with the URI reported in capabilities. The QGIS 2.18 incorrect behaviour (see #18099 and #16173) was fixed for QGIS 3 with PR https://github.com/qgis/QGIS/pull/6407.</p> <p>One or more DCP override options for WFS in the connection manager dialog window, like are needed in order to solve the problem.</p>
