Description

I updated osgeo4w installation and ended up with filenames such as qgis_ltr-dev-bin-ggrass76, qgis_ltr-dev-ggrass76 for bat, exe, env files. Note the double "g". It used to have a single g as far as I remember

osgeo4w: rely on GRASS' GISBASE environment variable instead of

detecting the path (ie. use the same version for processing as the

version that the grass plugin uses)
