

QGIS Application - Bug report #21674

QGIS crashes soon after opening raster heavy project with some vector layers with raster effects

2019-03-25 11:46 PM - Ventsislav Nikolov

Status:	Feedback	
Priority:	High	
Assignee:		
Category:	Project Loading/Saving	
Affected QGIS version:	3.6.0	Regression?: No
Operating System:	Windows 7	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	Yes	Copied to github as #: 29490

Please try with a new/clean profile.

#2 - 2019-03-28 10:30 PM - Ventsislav Nikolov

I forgot to mention that the problems were with an old project made with 2.18. Tried it with a clean profile, chrashes in the "main" QGIS window stopped, but continued when trying to edit settings in the layout window, which was also originally made with 2.18. Then I made a new layout from scratch and so far everything works ok and there are no crashes.
