

QGIS Application - Bug report #21683

Subscript and Superscript Single Labels expression bug

2019-03-27 04:17 PM - Uros Djuric

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Labelling	
Affected QGIS version:	3.6.0	Regression?: No
Operating System:	Windows 7 x64	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29499
Description		
<p>Hello,</p> <p>I am trying to label my polygons using Single Label option.</p> <p>I have set labeling to be in relation to the string from Attribute table column called "<i>Simboli</i>"</p> <p>That column contains a set of different labels that were written using HTML sub and sup codes (e.g. "<i>K<sub>2</sub><sup>2,3</sup></i>").</p> <p>(see Fig. number 1)</p> <p>After that, If I choose Expression dialogue, under the "<i>Output preview</i>" I can see regular formatted Label, as I wanted it to be. (see Fig. number 2)</p> <p>But, when I save everything, close all windows and come back to the map, again I can see only codes on my map (see Fig. number 3), instead properly sub and sup formatted numbers (or letters etc.)</p> <p>I suppose that this the bug, since within the "Output" preview everything is fine, but not on map canvas.</p> <p>Or maybe I didn't set something properly? I need this kind of labels in map canvas, not on print composer for which I know that support HTML rendering.</p> <p>sub_sup_label_BUG.png</p>
