

QGIS Application - Bug report #21713

invisible mouse cursor on specific backgrounds

2019-03-31 10:51 AM - Jan Lippmann

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	GUI	
Affected QGIS version:	3.4.6	Regression?: No
Operating System:	Win 7 64bit	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29529
Description		
<p>The mouse cursor of some tools (for instance: node, move, line offset, delete part, delete ring, rotate, simplify) is not visible, if the layersymbolcolor is exactly the color of the cursor. That makes some edit actions not possible. There are better cursors like the cursor for create or split feature. This Cursor is robust against the backgrounds. It would be very kind, if anybody could fix this for the 3.4.7 LTR.</p> <p>Thanks!</p> <p>Jan</p> <p>cursor_color_problem.gif</p>

Hello Giovanni,

you are right. I will do that.

#4 - 2019-05-01 11:19 AM - Jan Lippmann

- File *qgis-cross-cursor-ubuntu.gif* added

Some more details:

- It seems: that **only on Windows** AND the **specific Cross-Cursor** is the problem
- On Windows the specific Cross-Cursor has only the fill color near RGB 127,127,127 there is no outline color
- On Ubuntu the specific Cross-Cursor has white fill color AND a grey/black outline color (*qgis-cross-cursor-ubuntu.gif*)
