QGIS Application - Bug report #2172
Crash when classifying with 'graduated' renderer

2009-12-01 06:45 PM - springmeyer -

Status:	Closed			
Priority:	Low			
Assignee:	nobody -			
Category:	Symbology			
Affected QGIS version:		**Regression?:**	No	
Operating System:	Linux	**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	worksforme	
Crashes QGIS or corrupts data:		**Copied to github as #:**	12232	

Description

To replicate:

1) New project, load polygon shapefile (I used 'polys.shp' from qgis test data

2) Layer Properties, turn on "New Symbology"

3) Choose 'Graduated'

4) Hit classify, crash....

History

- Resolution set to worksforme

- Status changed from Open to Closed

There is no such shape in the qgis sample dataset, but I found one in the qgis-mapper svn that seems the one that was used.

I cannot reproduce the problem on both linux and windows using the latest svn code (commit:f2c0df21 (SVN r12308)) on both platforms.

Give it a try again, and then if the problem persist please attach the actual shape is giving you problems. Will reopen if necessary.
