

## QGIS Application - Bug report #21743

### Vertices symbols stay displayed after editing a polyline, and stay displayed even in a fresh new project file!

2019-04-03 11:17 AM - Romain P

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Map Canvas	
<b>Affected QGIS version:</b> 3.6.1	<b>Regression?:</b> No
<b>Operating System:</b> Windows 10	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> not reproducible
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 29558
<b>Description</b>	
<p>As usual on Qgis 2.18, I moved polyline nodes to reshape it. When I clicked on the crayon to finish and save modifications, red dots located on polylines stayed displayed.</p> <p>I tried to remove the corresponding layer, then the others, then starting with a fresh new project, refreshing the display, without success.</p> <p>This is a big issue, as I can't make a new Qgis project without this red dots.</p> <p>Attached is a printscreen of the described problem with a fresh project in Qgis Noosa.</p>

Thing is in that case, this red dots are still there after restarting qgis and/or computer. I didn't try to reinstall qgis, but that won't bring a proper solution to that problem.

*Thing is in that case, this red dots are still there after restarting qgis and/or computer. I didn't try to reinstall qgis, but that won't bring a proper solution to that problem.*

For an unknown reason, these red dots disappeared when I start my PC this morning...

If someone get this problem again, please report in this thread.
