

QGIS Application - Bug report #21762

Attribute Table object cannot have arbitrary dimensions

2019-04-03 08:47 PM - Brett Carlock

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	3.6.1	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29577
Description		
<p>It is not possible to set arbitrary dimensions for the attribute table object directly.</p> <p>However, this can almost be accomplished by setting the Attributes for the Main properties section of the Attribute table object.</p> <p>However, these sizes can only be whole/integer mm values, preventing some layouts from being possible as they'd have to be fractional mm values to line up properly.</p>
