| Easy fix?: | No | |
| Description | | |
| <p>I'd like to see Page Navigation controls for the Map Composer when there are multiple pages.</p> <p>Something inspired by the UI/UX of say, Edge, when reading PDFs (or really, any other PDF viewer, even QPDFView for instance) would be wonderful.</p> <p>A toolbar with controls for page changing (prev, next, begin, end, drop-down/text entry for jumping to a page) would be great.</p> <p>Additionally, an optional panel for Page Thumbnails would also be quite beneifical, especially for a large mapbook.</p> | | |
