

QGIS Application - Bug report #21772

Open Sea Map Seamarks

2019-04-04 07:07 PM - Zachary King

Status: Closed	
Priority: Normal	
Assignee:	
Category: Unknown	
Affected QGIS version: 3.6.1	Regression?: No
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 29587
Description	
Hi I was trying to open the web map Open Sea Maps seamarks and every time I try it cause qgis 3.6.1 to crash :/	

History

I'm afraid it's not related to the plugin manager at all.

I guess you load the OpenSeaMap using a plugin (probably Quick Map Services or OpenLayers Plugin), don't you?

Then please report the bug to the plugin author - you'll find the proper bugtracker webpage in that plugin's details in the plugin manager.

The issue is that when Open Sea Maps - Seamarks doesn't load in QGIS 3.6.1 the program crashes, I have written the Github thread about the Quick Map Services but that shouldn't be why the instance is crashing.

a plugin if has an issue can always crash the main program. If you find that this is **really** a qgis issue and not a plugin one then reopen this ticket.

Note: no crash here with that map from the QMS plugin, but also it does not show anything. Maybe the map provider has problems too.

does it crash if you don't use that map from that plugin?

So far not that I have seen, but I just updated today and this was the first task I tried, other maps such as Google Satellite or Esri Gray (light) work. The crash occurs when I try exiting out of the client and I get (Not Responding) in the top bar before the crash. I have started a thread on Github for the QuickMapServices plugin.

do not assign a developer, unless you are sure he is the right person and/or agrees.

If you have filed a ticket on the QMS repository/tracker then there is the right place, not here.

#8 - 2019-04-04 09:36 PM - Zachary King

Sorry it defaulted to him for some reason I didn't notice, well I am not entirely sure it's the plugin, that shouldn't cause the client to crash like it has.
