History
#1 - 2019-04-06 11:58 AM - Giovanni Manghi
- Subject changed from qgis crash when filtering a layer with an attachment field to qgis crash when filtering a layer with an attachment field
- Status changed from Open to Feedback
- Priority changed from Normal to High
- Crashes QGIS or corrupts data changed from No to Yes

duplicate/related to #19118 ?

#2 - 2019-04-06 12:01 PM - Giovanni Manghi

what are the exact steps to replicate?
to repeat the crash:

1) Have a layer of any geometry with such characteristics for at least one field:
   - widget type - attachment
     integrated document viewer (Type- web page)
2) Start filtering in the attribute table for any field

---

```

Cannot replicate here, can you please attach a project with data? thanks.

---

Jürgen Fischer

- Description updated

---

Sergii Brazhynenko added:

```
In the attached archive, project, gpkg-file, and a small video clip.
Thanks
```

---

Giovanni Manghi

- Status changed from Feedback to Open
- Operating System deleted (Ms windows 10)

Confirmed also on Linux:

QGIS died on signal 11
Could not attach to process. If your uid matches the uid of the target process, check the setting of /proc/sys/kernel/yama/ptrace_scope, or try again as the root user. For more details, see /etc/sysctl.d/10-ptrace.conf

ptrace: Operation not permitted.
No thread selected
No stack.
gdb returned 0
Aborted (core dumped)

- Assignee deleted (Alessandro Pasotti)

Sorry I couldn't make it, apparently the bug is inside QtWebKit (upstream), I'm attaching a valgrind snapshot with the invalid write.

this also means that the attachment widget is (from a user point of view) completely "broken"? https://issues.qgis.org/issues/19118
