

QGIS Application - Feature request #21778

Activate as predefined, the "preview" tab in the properties of the vector layers

2019-04-05 08:34 PM - luca bellani

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	GUI	
Pull Request or Patch supplied:		
Easy fix?:	No	Resolution: Copied to github as #: 29593
Description		
<p>When I activate the properties of the vector layers, in the resource navigator panel, 3 tabs appear: Metadata, preview, attributes table.</p> <p>However, as the vector file changes, the tab always returns to the first "METADATA".</p> <p>I realized that if I have to do a quick search for layers, in the tab "preview", I always have to click on it every time. It would be much more easy to stay on "Preview".</p> <p>Thank you!</p>
