QGIS Application - Feature request #21787
GetFeatureInfo responses with URLs should be clickable

2019-04-08 10:27 AM - Andreas Neumann

Status:	Closed		
Priority:	Normal		
Assignee:	Alessandro Pasotti		
Category:	Web Services clients/WMS		
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Easy fix?:	No	**Copied to github as #:**	29602

Description

It would be good if QGIS as a WMS client would automatically generate clickable URLs for text/varchar fields that contain text that starts with http://,https:// or ftp://

It should be done for all formats where possible: text/plain, text/html and application/json

Example is in a screenshot attached.

Fixes #21787

History

#1 - 2019-04-08 10:27 AM - Andreas Neumann

It should open a browser and display the URL.

#2 - 2019-04-08 10:29 AM - Andreas Neumann

If the URL is already in a <a /> element, the replace of the clickable URL should not happen (e.g. in HTML GetFeatureInfo response)

#3 - 2019-04-12 08:18 AM - Andreas Neumann

- Assignee set to Alessandro Pasotti

#4 - 2019-04-15 08:46 AM - Alessandro Pasotti

- Status changed from Open to In Progress
- Resolution set to fixed/implemented

PR https://github.com/qgis/QGIS/pull/9787

#5 - 2019-04-15 04:46 PM - Alessandro Pasotti

- % Done changed from 0 to 100
- Status changed from In Progress to Closed

Applied in changeset commit:qgis|0acc0565e43c354758386c81dc642749dab3984f.
