

QGIS Application - Bug report #21793
DXF-Export

2019-04-08 04:21 PM - Adrian Beck

Status:	Open	
Priority:	Normal	
Assignee:		
Category:	DXF export	
Affected QGIS version:	3.4.5	Regression?: No
Operating System:	Windows	Easy fix?: No
Pull Request or Patch supplied:		Resolution:
Crashes QGIS or corrupts data:		Copied to github as #: 29608
Description		
<p>If i export any point-layer to DXF, the point are 3 to 5 times bigger in the DXF-Viewer then in QGIS. I tried to change the scale-dependent visibility but with no result.</p> <p>Is this a common problem or am i doing something wrong?</p>
