

QGIS Application - Feature request #21798

Improve Text Layer Handling

2019-04-08 06:25 PM - Brett Carlock

Status:	Open	Resolution: Copied to github as #: 29613
Priority:	Normal	
Assignee:		
Category:	Data Provider/Delimited Text	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
<p>It'd be great to have the ability to change/enable/disable the various behaviors/features of Text Layers after they've been imported to a project.</p> <p>For instance, being able to toggle on/off Watch File, Subset Indexing, changing Geom columns (if a file gets modified down the line), Column Type Detection, etc.</p> <p>Currently, to enable watching a file I'd have to remove/re-add it, breaking all the joins in my current project. Instead, in order to reflect updates, I now close/re-open my QGIS project.</p>
