QGIS Application - Bug report #21816
Security issues in QT5

2019-04-09 11:43 PM - Russell Fulton

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	GUI			
Affected QGIS version:	3.7(master)		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	up/downstream
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	29631

Description

Hi

not sure if this affects QGIS or not but I figured you need to be aware of this issue if you are not already.

Qt5-Based GUI Apps Susceptible to Remote Code Execution

https://www.bleepingcomputer.com/news/security/qt5-based-gui-apps-susceptible-to-remote-code-execution/

History

#1 - 2019-04-10 05:12 PM - Giovanni Manghi

- Resolution set to up/downstream

- Easy fix? changed from Yes to No

- Status changed from Open to Closed

This should be raised in the developer mailing list (is not a bug in qgis code anyway).
