

QGIS Application - Bug report #2186

"New Symbology" button logic is backwards

2009-12-03 04:25 AM - barryrowlingson -

Status: Closed	
Priority: Low	
Assignee: Martin Dobias	
Category: Symbology	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12246
Description	
<p>Go to layer, properties, Symbology pane: See the 'New symbology' button. Click it. Message is:</p> <p>"Do you wish to use original symbology implementation for this layer?"</p> <p>And no, I don't, I wish to use the new symbology. So I click 'No'. But it stays on the old (original) symbology. If I click 'Yes', I get the new symbology pane.</p> <p>The dialog string should say 'Do you wish to use the new symbology' at that point. It should probably be shorter, maybe just "Switch layer to New Symbology"? With [Yes No] buttons. The corresponding dialog from the "New Symbology" pane should prob say "Switch layer to Old Symbology?" with [Yes No] buttons.</p> <p>On r12318.</p>
