QGIS Application - Bug report #21880
Style file (QML) can't be used to add styles to rasters

2019-04-18 08:23 AM - Josin Tharian

Status:	Closed			
Priority:	High			
Assignee:				
Category:	Decorations			
Affected QGIS version:	3.6.1		**Regression?:**	No
Operating System:	Windows 10		**Easy fix?:**	Yes
Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	29695

Description

When styling raster files using QML file through 'Load style' button in Symbology panel, after clicking OK or Apply button, a default style gets applied and QML file is discarded.

After clicking the apply button

The only work around is to rename the style file to the same name as raster and place it in same folder. Still if you click ok or Apply button in symbology panel, the style changes to a default one.
