<b>Description</b>		
<p>Since ESRI updated to TLS 1.2 connecting to their MapServer, e.g <a href="http://server.arcgisonline.com/arcgis/rest/services">http://server.arcgisonline.com/arcgis/rest/services</a> works, but after several hours I lose connection with a "Network error: Network access is disabled." error.</p> <p>Stopping and restarting QGIS reestablishes the connection for several hours.</p>
