

QGIS Application - Bug report #2191

Attribute table: edit text window size not matching column width

2009-12-03 08:05 AM - Donkagen2 -

Status: Closed	
Priority: Low	
Assignee: Jürgen Fischer	
Category: GUI	
Affected QGIS version:	Regression?: No
Operating System: All	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 12251
Description	
If the attribute table column width is increased from the default, when editing a text field the visible editing text string doesn't match the column width.	

History

#1 - 2009-12-19 05:52 AM - Borys Jurgiel

I fixed a similar problem with the widget resize in commit:9ad21f7c (SVN r12035), but due to changes in it's broken again and I can't manage to set the widget resizing policy. Jürgen heeeelp...

It's, however, better than was, because previously columns were being shrunk to a default size of the widget.

#2 - 2009-12-20 05:58 AM - Borys Jurgiel

The problem is in line 88 of qgsattributetabledelegate.cpp:

```
editor->adjustSize();
```

It makes the widget always adjusting to its default size. I'd remove this line, however it's good for one widget class: the file selector, what is higher than the row height. What about testing the editor class and adjusting only if it's the file selector?

#3 - 2009-12-20 10:20 AM - Jürgen Fischer

- Resolution set to fixed

- Status changed from Open to Closed

fixed in commit:e863e7d5 (SVN r12546)
