

QGIS Application - Bug report #21913  
attribute header names are not saved

2019-04-23 02:58 PM - rawan gis

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	Map Composer/Printing	
<b>Affected QGIS version:</b>	3.6.2	<b>Regression?:</b> No
<b>Operating System:</b>	windows	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29728
<b>Description</b>		
Hello when adding attribute table to the layout,the header name for fields can be changed but it will not be saved, so if I closed QGIS and open it again the header name will be the original name. regards

- Status changed from Open to Feedback
- Easy fix? changed from Yes to No

Cannot confirm here on Linux. Can you attach a sample project and sample data that shows this problem? Thanks.

#2 - 2019-04-24 07:24 AM - rawan gis

- File headercustomized.pdf added
- File headernotsaved.pdf added

HI  
the attached file include two pdf files one with the column header customized and the other show that the customized header was not saved.  
Regards

#3 - 2019-04-24 07:49 AM - rawan gis

- File attributesheader.jpg added

HI  
the attached file include two pdf files one with the column header customized and the other show that the customized header was not saved although I saved both the layout and the project this problem appears in any project regarding the data in all QGIS 3 versions  
Regards

thanks. I think it is fixed now but if the layout with the attribute is created using previous versions then the attribute table should be deleted and added again to save the header

I would love to try a project where is possible to see this issue...

#7 - 2019-04-24 02:21 PM - rawan gis

- File atlas2.rar added

kindly see the attached project in which the layout has an attribute that was added in QGIS version 2.18 and its header can not be saved .its small project since the allowed uploaded only 5mb  
regards
