<b>Crashes QGIS or corrupts data:</b>	Yes	<b>Copied to github as #:</b> 29763
<b>Description</b>		
I am running QGIS version 3.4.6. It is crashing if I have the Advanced Digitizing active with snapping enabled. When I turn off snapping, Advanced Digitizing works as it should.

Can't replicate here. Would you mind attaching a sample project+sample data? Also try on a new/clean qgis profile (no 3rd party plugins installed).
