QGIS Application - Bug report #21950
layer properties panel hides labels

2019-04-29 10:07 AM - Niccolo' Marchi

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	GUI		
Affected QGIS version:	3.4.7	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	29765

Description

The "layer properties" panel shows only the icons by deafult. When the bar is dragged to the right in order to widen the box and let the icons' labels appear, it automatically hides everything, requiring the user to close and reopen the whole panel (see picture attached).
I freshly updated to 3.4.7 and the bug is still present.

History

#1 - 2019-05-01 06:01 PM - Giovanni Manghi

- Operating System deleted (W10)

- Affected QGIS version changed from 3.4.6 to 3.4.7

- Priority changed from High to Normal
