Category:	C++ plugins/Georeferencer			
Affected QGIS version:	3.6.1	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**		
Crashes QGIS or corrupts data:		**Copied to github as #:**	29772	

Description

Georeferencing features is not working and has been like this for almost 2 weeks now. I require this features/plugin with almost all my projects and this has been rather frustrating not been able to use this. The plugin from the python console works but not as well as the built in version. Please could you rectify this?

History

#1 - 2019-04-30 11:36 PM - Borys Jurgiel

- Resolution deleted (fixed/implemented)

- Priority changed from High to Normal

- Assignee deleted (Borys Jurgiel)

- Category changed from Plugin Manager to C++ plugins/Georeferencer

Could you please explain what exactly doesn't work for you? Does the plugin crash or doesn't start or is not listed in the plugin manager at all? Do you get any error messages?
