

QGIS Application - Bug report #21984

The composer export functions don't remember last used path on mapped network drives

2019-05-03 10:01 AM - Pierre Kremer

<b>Status:</b>	Open	
<b>Priority:</b>	Normal	
<b>Assignee:</b>		
<b>Category:</b>	GUI	
<b>Affected QGIS version:</b>	3.6.2	<b>Regression?:</b> Yes
<b>Operating System:</b>	Windows 10 PRO	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 29799
<b>Description</b>		
<p>Unlike in version 2.18.28, <u>when exporting to a mapped network drive</u>, the default path is reset to the network drive root with each export from the composer (image, pdf etc.)</p> <p>NB: after closing Qgis and reopening another project, the last used path from the previous project is proposed with the first export, then is reset with the next export.</p>
