| **Crashes QGIS or corrupts data:** | No | **Copied to github as #:** | 29816 |

**Description**

In QGIS 3.4 the Historicization of a table works smoothly, except for the fact that the current_user is added to the table when creating or deleting a feature, but not when updating. Does anyone confirm? I had a look to the function[0] but I could not find anything obvious explaining the failure.

```

CREATE OR REPLACE FUNCTION "gis"."polygons_update"()
RETURNS TRIGGER AS
$$
BEGIN
  IF OLD."time_end" IS NOT NULL THEN
    RETURN NULL;
  END IF;
  IF NEW."time_end" IS NULL THEN
    INSERT INTO "gis"."polygons"
("id_0","geom","id","name","area","centroid", "time_start", "time_end")
VALUES
(OLD."id_0",OLD."geom",OLD."id",OLD."name",OLD."area",OLD."centroid",
OLD."time_start", current_timestamp);
    NEW."time_start" = current_timestamp;
    NEW."ruolo_utente" = current_user;
  END IF;
  RETURN NEW;
END;
$$
LANGUAGE 'plpgsql';
```
