

QGIS Redmine (QGIS bug tracker) - Bug report #22004

Veetex tool not working on lines when style assigned

2019-05-06 02:37 PM - Peter Cornelissen

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Any	
Pull Request or Patch supplied:		
Description		
<p>I have a project with numerous layers. On a line or polygon shapefile layer without style, it woks fine, however, if I use the same shapefile and it has style associated with it (once it has been saved), the vertex editor does not work. Reproducible on my project with all shapefiles.</p>
