QGIS Application - Bug report #22036
Zoom in/out and autorefreshing of raster doesn't work after georeferencing

2019-05-09 02:25 PM - Lukasz Olszyna

Status:	Open		
Priority:	High		
Assignee:			
Category:	Map Canvas		
Affected QGIS version:	3.4.4	**Regression?:**	Yes
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	29850

Description

Steps:

1.Load SHP files

2. Open the georeferencer and load the map (JPG file) to be georeferenced

3. Choose the transformation and output settings

4. Add points, press 'Start georeferencing' georeferenced map has been added as raster (TIF file) to map canvas

5. Untick 'Load in QGIS when done' and add /remove/move points in georeferencer window, press 'start georeferencing' again

QGIS 2.18.3 result: Georeferenced map refreshed automatically in project window after zoom in/out.

QGIS 3.4.4 result: Georeferenced map is not refreshed after zoom in/out, georeferenced raster is displayed only in one zoom level, in other zoom levels is not displaying properly (black or color stripes area):

!QGIS error.jpg!

It is possible to work around this issue by delate old raster from map canvas and load new raster, but it was not necessary in previous QGis version.

History

#1 - 2019-05-10 06:13 PM - Giovanni Manghi

- Priority changed from Normal to High

- Category changed from Unknown to Map Canvas
