

QGIS Application - Bug report #22039

Incorrect worldfile generation

2019-05-09 04:04 PM - luca76 -

Status: Closed	
Priority: High	
Assignee:	
Category: Map Composer/Printing	
Affected QGIS version: 3.6.2	Regression?: No
Operating System: Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: No	Copied to github as #: 29853
Description	
<p>On QGIS 2.18 and 3.6, opening the Print Composer and saving with it to a JPEG with Worldfile, the JPW is generated as here:</p> <pre>0.076330820580 0.000000000000 0.000000000000 -0.076336884245 666772.714626354864 5102079.949439144693</pre> <p>There are empty lines between numbers and two empty lines after the last number. They should not be there. For this reason, AutoCAD cannot recognize these worldfiles.</p>
