QGIS Application - Bug report #22066 Valid file URL link fails in Identify window

2019-05-13 06:02 PM - Dave S-B

Status:	Open			
Priority:	Normal			
Assignee:				
Category:	Map Tools			
Affected QGIS version:3.6.2		Regression?:	No	
Operating System:	Windows 10	Easy fix?:	No	
Pull Request or Patch supplied:		Resolution:		
Crashes QGIS or corru pits data:		Copied to github as #: 29879		
Description				

In the identify window, URLs contained in attributes are displayed as links so you can click through to them. For valid file urls (starting "file:///"), the link is displayed correctly in the window, but on clicking it adds "http://" to the start of the URL which makes it incorrect.

History
