

## QGIS Application - Bug report #22093

### Layer style is not maintained when changing windows folder

2019-05-16 12:44 PM - Maxime RIOU

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Symbology	
<b>Affected QGIS version:</b> 3.6.2	<b>Regression?:</b> No
<b>Operating System:</b> Windows 7	<b>Easy fix?:</b> Yes
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> duplicate
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 29906
<b>Description</b>	
<p>I work on a QGIS Project with several layers. I sorted my layers in Windows as the folders were a bit messy. I reopened QGIS and handled unavailable layers that have been moved. I noticed that the style of these layers is not preserved. Only the style visible at the opening of QGIS project is not preserved, if the layer has several styles the others are still available. I guess this is linked to the structure of *.qgz file calling for each layer with a specific style at the opening of the project?</p>
