

QGIS Application - Bug report #22103
GRASS module v.to.rast -- combobox to select label field only lists numeric fields

2019-05-20 09:46 AM - Daan VAN SETTEN

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	Processing/GRASS	
Affected QGIS version:	3.7(master)	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 29916
Description		
<p>Hello -</p> <p>In GRASS module v.to.rast, the combobox "Name of column use as raster category labels" only proposes numeric fields.</p> <p>However, for this field we would typically select a string type field</p> <p>Thanks in advance,</p> <p>Daan</p>		

History

#1 - 2019-05-21 10:59 AM - Giovanni Manghi

- Easy fix? changed from Yes to No
- Operating System deleted (Windows 10)
- Status changed from Open to Feedback
- Category changed from GRASS to Processing/GRASS

Unless I'm missing something I think that the parameter does not make any sense in the context of Processing/GRASS:
in Processing data is imported into a temporary mapset/location as a GRASS vector/raster, processed (in this case imported and given labels to pixels)
but then is immediately exported to simple-feature or a non GRASS rasters... so labels are anyway lost.
